DISSEMINATION OF EL4VET BY ATHENA (CZ)

ATHENA has connected various activities in the project EL4VET with the dissemination – especially the transfer workshop and the pilot of tools for bringing the information about the project and its products to the target group – VET trainers and teachers. Some of them were organised in the last months of the project duration.

ATHENA presented it on the national level, too – conferences organised by the Czech National Agency for EU projects. Article published in the bulletin of the town Ostrava brought the information to the general public too. Clients of ATHENA can benefit from the products in various training courses organised by ATHENA.

Employment Office in Ostrava was given the information about the exploitation of the products in various regional educational organisations – their trainers teach and train unemployed people in courses organised by the Employment Office.
